

Your and our health is our top priority. ♥

In addition to our **cleaning and disinfection system of the spa**, saunas, showers as well as the rooms: gym, adventure bath, WC facilities, shoe and ski room...

... we disinfect daily with ANOSAN:

- highly effective against bacteria, viruses, mold, spores and well-tolerated for humans and animals.
- purely mineral without organic compounds and without polluting residues
- pH-neutral
- 100% environmentally friendly and does not leave any chemically aggressive residues

ANOSAN[®] Alpin-Edition

is based on the so-called IMEALIT method (interactive membrane electro-chemical activated low ions transfer) and allows **cold fogging without waiting time**.

It has been specially developed for rooms with a stay in person - the cell membranes of the pathogens are destroyed with which it comes into contact.

The ultra-modern **disinfection system ANOSAN**, can be used for all types of textiles, surfaces, sports equipment, rooms, etc.

Use for surfaces, people, food, etc. is unproblematic because it is non-toxic and harmless.

The treatment lasts up to 24 hours.

This mode of action makes any resistance of germs, bacteria and viruses impossible!
